

Litter bin made with reinforced galvanised steel with laser-cut square holes, treated with Ferrus, a protective process that guarantees high resistance to corrosion.

Ref.	A	B	H	H1
PA692SGRH	400	400	1025	785

The Ferrus treatment consists of three layers applied after shot cleaning all impurities: an electrolytic bath, an epoxy coating and a grey RAL 9006 polyester paint coating.

Supported by means of a solid structure and a triangular anchoring base with holes to fix it to the ground.

Recommended anchoring: by means of three M8 expansion bolts depending on the surface and the project.
